

ErgonomicAutomatic cut

Automatic cut mechanism and an EDS mode

Time savings

Fanfolded packs of paper offer minimal handling time

Cost efficient

Runs at high speed allowing maximum box throughput

The **ergonomical solution** for filling boxes in **high volume** pack station environments

The converter forms single layer kraft paper into a high volume star-shaped paper configuration, which can be used as a very effective filling material. It prevents products from shifting around in their box, ensuring damage-free arrival at the end destination. The converter has an automatic cut mechanism which eliminates manual tearing and gives the operator more comfort. Both high and low volume operations benefit from this ergonomical solution.

Go Green

Our company works with FSC® certified suppliers. Paper is climate neutral, recyclable and also a renewable source.

Specifications of the system

Converter

Dimensions: 43x45x46 cm

Weight: 10 kg

· Voltage: 100-230 Volt

· Power: 150 Watt

Speed: 1.4 m/s

Cut method: automatic

Paper

Base weight: 50 gr/m², 70 gr/m²

Pack length: 500 m, 360 m

· Paper width: 38 cm

• Average pack weight: 9.5 kg, 9.6 kg

Average yield: 1.5 m³

Our Added Value

Packaging Engineering

Ranpak analyses and reports on your current packaging solution. The drop test shows exactly how much shock is transmitted to your products through the packaging. Ranpak then suggests alternatives how to improve protection or save costs.

Integrated Applications

The Ranpak Added Value department can design structures, frames and other innovative solutions to integrate the packaging converter anywhere around, above or under a packing area.

Packaging Training

Training from our packaging experts will help your packers to use up to 20% less packing material, without compromising the quality of the packaging.

Successful in these industries

Logistics	Lighting	E-commerce	Toys & Sport	Publishing
Decoratives	Cosmetics	Computers	Pharmaceuticals	Gourmet food
