

FillPak®

High Volume Void Fill,
Fast Throughput

Time savings

Fanfolded packs of paper offer minimal handling time

Cost efficient

Runs at high speed allowing maximum box throughput

Simple

Easy to use, multiple speed levels and an EDS mode

The **fastest in line solution** for filling boxes in **high volume** packaging operations

The converter forms single layer kraft paper into a high volume star-shaped paper configuration, which can be used as an effective filling material. It prevents products from shifting around in their box, ensuring damage-free arrival at the end destination. The converted paper gets dispensed directly at the point of operation, improving the efficiency of the packaging process and optimizing the speed of working.

Go Green

Our company works with FSC® certified suppliers. Paper is climate neutral, recyclable and also a renewable source.

Specifications of the system

Converter

- Dimensions: 90x97x235 cm
- Weight: 176 kg
- Power: 200 Watt
- Frequency: 50/60 Hz
- Speed: 0.8 - 1.2 - 1.4 m/s
- Cut method: automatic

Paper

- Base weight: 50 gr/m²
- Pack length: 500 m
- Paper width: 76 cm
- Average pack weight: 19 kg
- Average yield: 3 m³

Our Added Value

Packaging Engineering

Ranpak analyses and reports on your current packaging solution. The drop test shows exactly how much shock is transmitted to your products through the packaging. Ranpak then suggests alternatives how to improve protection or save costs.

Integrated Applications

The Ranpak Added Value department can design structures, frames and other innovative solutions to integrate the packaging converter anywhere around, above or under a packing area.

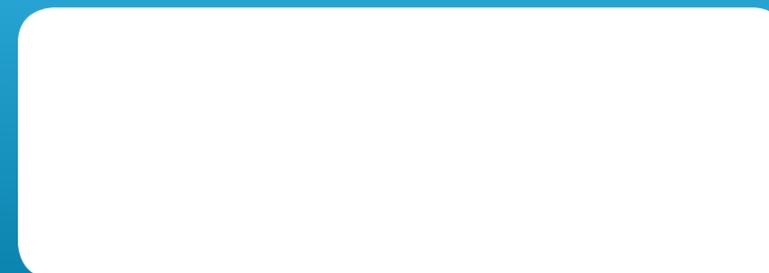

Packaging Training

Training from our packaging experts will help your packers to use up to 20% less packing material, without compromising the quality of the packaging.

Successful in these industries

Logistics	Apparel	E-commerce	Lighting	Pharmaceuticals
Toys & Sport	Cosmetics	Computers	Publishing	Gourmet food
