

Flexible

Pad can be used for items of all shapes and sizes

Cost efficient

Less material needed to provide optimal protection

Performance

Unique pad design offers optimal protection

The **compact** cushioning **solution** for **pack station environments**

The PadPak CC is the solution to pack and protect smaller scaled items right at the packer's workstation. Due to the small footprint of the converter, the system can be placed on the workstation or on a floor stand right next to it. Both 1 and 2 layer paper is available, so either light or heavy products can be packed with excellent protective performance.

Go Green

Our company works with FSC® certified suppliers. Paper is climate neutral, recyclable and also a renewable source.

Specifications of the system

Converter

• Dimensions: 51x81x55 cm

Weight: 50 kgPower: 350 WattVoltage: 100 - 240 VoltFrequency: 50/60 Hz

Paper

Base weight: 50/50 gr/m², 50/70 gr/m²

Roll length: 225 m, 180 m
Roll weight: 8.6 kg, 8.2 kg
Base weight: 70 gr/m²

Pack length: 360 mPack weight: 9.6 kgPaper width: 38 cm

Our Added Value

Packaging Engineering

Ranpak analyses and reports on your current packaging solution. The drop test shows exactly how much shock is transmitted to your products through the packaging. Ranpak then suggests alternatives how to improve protection or save costs.

Integrated Applications

The Ranpak Added Value department can design structures, frames and other innovative solutions to integrate the packaging converter anywhere around, above or under a packing area.

Packaging Training

Training from our packaging experts will help your packers to use up to 20% less packing material, without compromising the quality of the packaging.

Successful in these industries

Jewelry	Tools	Electronics	Medical	E-commerce
Technical Instruments	Cosmetics	Toys & Sport	Decoratives	China & Glass
